

Elide Fire Extinguishing Ball

Shree Shyam Bearings Pvt Ltd has brought the Elide fire extinguishing ball to Kolkata. The 1.3kg ball-shaped device, which its designers claim is emerging as the industry standard in the global fire protection market, can be used even by a child to stop fire rapidly and effectively.

Invented by Woradech Kaimart of Thailand and manufactured under the exclusive world property right patent held by Siam Safety Premier Co Ltd, the ball self activates only on contact with fire within 3 to 10 seconds, dispersing chemicals that stop the fire within a radius of 24ft.
